DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 are drawn to a synchronization system where a reformatted input file is created by applying an updated algorithm to the input file and uploading the reformatted file to a host database, classified in class 707, subclass 201.
 - II. Claim 12 is drawn to a clearinghouse database containing fund family data, classified in class 707, subclass 104.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

Inventions in Group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are information retrieval by using (1) a synchronization system where a reformatted input file is created by applying an updated algorithm to the input file and uploading the reformatted file to a host database, (2) a clearinghouse database containing fund family data.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

During a telephone conversation with Jonathan Bershadsky on July 18 2006 a provisional election was made without traverse to prosecute the invention of Group 1, claims 1-11. Applicant in replying to this office action must make affirmation of this election. Claim 12 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, the claim states, "populating at least a portion of said data field in said spreadsheet with assumed data values".

Examiner is not sure what the Applicant means by "assumed values"? What is this assumption based on? The usage of the word "assumed" without proper clarification is vague and indefinite.

As to claim 8, the claim states "generating fictitious data".

Examiner is not sure what the Applicant means by "fictitious data"? What makes the data fictitious? The usage of the word "fictitious" without proper clarification is vague and indefinite.

Claim 8 also recites the limitation "said parameters". There is insufficient antecedent basis for this limitation in the claim.

Appropriate correction is required.

Allowable Subject Matter

4. Claims 2-7 and 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
